In Memoriam

FRANCES MARIE SHEVENELLE

October 14, 1944 - July 7, 1974

This memory book is dedicated to Fran Shevenelle who waged a long and courageous battle with cancer. Fran's quiet determination and refusal to lose her faith, spirit, sense of humor and love of life in the face of tragedy and pain are an inspiration to the Class of '65. We shall not forget her.

After graduation Fran began teaching at Margate Jr. High in Margate, Fl., where she became head of the English Department. During her free time she worked with the "Self Help Program", helping the underprivileged. She also found time for graduate studies and earned her M.Ed. from Fla. Atlantic University in 1968. In 1970 Fran left Margate Jr. and began teaching at Melbourne High School in Melbourne, Fl. She was a successful language teacher and sponsored an active French Club. Fran taught at Melbourne until her death. Between her teaching duties and extensive medical treatments Fran found time for frequent activities. In an article about her the Brevard Lifestyle quoted Fran as saying, "I've had to slow up on some things, but I go to the beach, swim, take my classes on field trips, go to all the football games. At home I make candles...I make my own bread and enjoy cooking." Fran became an active member of the American Cancer Society, the Brevard Chapter - "If I can just help one person to overcome cancer or help in any way to alert people that sometimes there are no warning signals, that it strikes unannounced, I will feel that I have accomplished something." To honor Fran, Melbourne High found a language scholarship in her name. The "Frances Shevenelle Language Scholarship" will be awarded in June, 1975.

Pt. Lauderdale, Fla. 33312

Lourdes went on to Bryn Mawr College and received her M.A. in 1966 and her Ph.D. in 1972. Her graduate work at Bryn Mawr was an intellectual challenge as well as a treat.

Lourdes met her husband, James Thomas, a mechanical engineer on a blind date arranged by Teresa Amato (who also attended Barry for one year). They now have two children, Lourdes Ann, age 7, and Jimmy Jr., age 5. She is very, very busy and is teaching full time at Pinecrest Prep. School.
Lois' description of her first year after graduation was in a word, dull! (she taught English at Immaculata High School). However, things have improved greatly since then. She spent three thoroughly enjoyable & interesting years in Germany working with the Special Services Agency of the U.S. Army. She was able to do a lot of traveling in Europe at this time.

After Germany, she went to Washington, D.C. where she worked for two years with the Gerontological Society (an organization of professionals in the field of aging). This was another interesting job which entailed quite a lot of travel, this time, in the U.S.A.

While in Washington she started her graduate work in linguistics at Georgetown University. She is now finishing her masters at the University of Minn. in Duluth.

Lois' most wonderful experience was her marriage this past summer to John F. Jones. John was an old family friend whom she "re metam" two years ago in Washington. He is presently Dean, School of Social Development - U. of Minn. in Duluth.

Some of the accomplishments of which Lois is most proud: "I can now ski (both downhill and cross-country), ice skate, and play a fairly decent game of tennis."

The Jones' future ambitions - "Possibly an overseas assignment, raise a family, get Lois' M.A. soon, and perfect their form in skiing and tennis."

Ingrid Mehrmann Healy - Lynch
1500 Sycamore St.
Haddon Heights, New Jersey 08035

Currently, Ingrid is assistant director of nursing education at Children's Hospital, Philadelphia, Pennsylvania. She has her Masters in Maternal Child Nursing (University of Washington - Seattle - 1972). She is married to Jack Lynch, a pediatrician. They met while co-therapists. (Therapy for parents whose children died from malignant diseases.) Ingrid has two children, Michael, age 9 and Maureen, age 7, also stepson, Christopher, age 13 and stepdaughter Suzanne, age 11.

Here are some excerpts from her letter: "Unfortunately, I won' be able to attend the reunion this summer. We are moving back to Seattle and will be somewhere between here and there at the end of June. We will be camping our way across lower Canada with four children and two dogs."
Much has happened to all of us in the past ten years, I'm sure. Right after graduation I got married and Michael and Maureen were born in the next two years. My husband, Peter, died in a boating accident in 1968. After some necessary planning, I went back to school and moved from Michigan to Seattle, Washington. Their Masters program was one year and I went on for post graduate work with handicapped children for another year while the thesis took final shape. (I did it on home deliveries among 'hippie-type' women, whatever that term means. It was really fun!) My first job was as a nurse-coordinator in an out patient clinic for children with cancer. Working in such a setting was challenging, difficult at times, but I truly loved the job. The grant money for this position ran out just as I was planning to move to Philadelphia."

"Why would anyone in their right mind move from Seattle to Philadelphia? - his name is Jack Lynch! Jack is a pediatrician and currently in the Navy. He will be getting out of the service in June and hence our return to beautiful Seattle. Jack has two children from his former marriage, Christopher and Suzanne. I wish they lived with us but we have to make do with vacations for now. He will be opening a private practice in Issaquah, Wash. in August. It's a small town about 20 miles from Seattle - at the foot of the mountains which will be great for skiing and backpacking!"

"My plans for working are a bit indefinite. I would like to go back to school to be a nurse practitioner and work with Jack. Time will tell how it all works out. I may have to generate some income during our first year back before indulging in further schooling."

"In my present position, I have administrative responsibilities and am a clinical instructor in the hospitals out patient clinics. The hospital offers a pediatric affiliate program for students from eight Pennsylvania diploma schools. It has been a good learning experience for gaining further perspectives on nursing education, hospital finances, etc. (Children's Hospital gained recent fame for separating the Rodriguez Siamese twins.) I'll be quitting the first week in May."

Sylvia M. Mennell Hendricks
Calle 5, #D-13 Tintillo Gardens
Guaynabo, Puerto Rico 00657 783-8538

Sylvia received her M.A. from the University of Denver in 1966. Currently, she is a programmer/analyst. She writes, "I am working and love it. I have the craziest schedule in the world and a nutty job too. What was amazing was the way I got it... lots of nerve and appearing self confident when I had no idea of what I was doing." While at the University of Denver Sylvia took many theoretical courses on computers. "However, I never did program very much. In those snobbish days I considered it somewhat beneath me to actually program the darned machine. But I wrote my resume to imply that I had. Then of course I had Mark's help. (Mark, her husband, has his doctorate and currently is Manager of Software, Standards and Teleprocessing at the Puerto Rico telephone company.) "I had been hearing data processing vocabulary for years so I knew what all those cute initials stood for and could even make a few intelligent statements about various aspects of data processing. (Still could not program though!) Then Mark said, well, I'll teach you Assembler Language at home, in a week
no less! So every night we would stay up until midnight and he
would drill me....After that Mark gave me several 'assignments'
of programs I had to write for him. He would key punch them at
work and run them and then bring them home for me to debug. This
turned out to take 2 months. Then I wrote me resume and hit the
job hunting trail. Would you believe I got the third job I applied
for. And what takes the cake is that to this day they think they
hired an experienced programmer. I have been there since April
(1974). Of course, you can well imagine I am much better pro-
grammer and analyst now. Now I am also a member of the Division's
Planning Section- another one of those incredible learning expe-
riences."

"The reason I can carry all this off is by my family's help.
Mark cooks breakfast and cleans up, I do dinner. Lunch we all
eat out. Saturday I have 2 maids who come in for 2 hours and clean
the house like a white tornado. Cheryl is in second grade and
rides the bus both ways. Lisa is in Kindergarten 5 days a week
and also rides the bus. My mother and father live close by and
the buses leave them both at their house until we can pick them
up. My Dad is working so this gives my Mom something to do. I
do some shopping at lunch and the rest we do on Saturday after the
maids leave at 10:00. I wash every chance I get on the weekend.
We have survived a water workers strike and a water rationing this
summer, also various power failures."

"I am happy in this nutty life style."

Kathy, divorced, writes, "Belatedly I am enjoying the 'single life' but with 3 children it's a distant cousin to the college days 'single life' we all knew. After graduation I began teaching at Carol City Jr. High and caring for my young daughter - though not in that order - and it's set the pattern of my life till now. Future plans are to stay happy and healthy from day to day. Beyond that we can't even see! Besides my regular teaching position I have also been recently connected with the Stretch 'n'Sew Fabric Center in North Miami, where I give sewing classes. Anyone interested in beautiful fabrics, helpful lessons and knowledgable and congenial salespeople stop in and look around."

"Although I'm kept busy with my children and job, I do manage to keep up with some hobbies. I enjoy being in the yard and working with my plants. Many weekends find me keeping up with the demands of being a homeowner. Sewing for myself, the children and occasionally for friends fills in the empty spaces."

Paula summarizes her years since Barry by saying, "In the ten years past I have been very fortunate to be blessed with two beautiful children and ten good years of marriage. The past three years found me back in school studying toward a degree in dental hygiene. It was very difficult as the program was full time, very demanding, with a great deal of studying. After persevering (with my husband and children backing me all the way) I did graduate, pass the National Board Exams and Florida State Board Exams in order to obtain my license. Joanne Rask Kelly
6863 Patricia Dr.
West Palm Beach, Fl. 33406 686-0280

Joanne writes that "after graduation I happened to deliver a package to Rosarian (Dominican high school in W. P. Bch. - all girls). By chance I met my old Math teacher in the parking lot and she asked me if I wanted a job teaching Math., and assorted other things in Junior High. That first year of teaching is unforgettable. What enthusiasm! Makes me exhausted just thinking of it. We took lots of field trips. Met my husband, Jim, that March '66 in a bowling alley and at several parties where we tried hard to avoid each other. He was from Mississippi working here at Pratt & Whitney as an engineer - still is. A year later we were married. But before that what a summer - a trip Out West camping with my brothers and sister and also one to Europe alone. (Jim gave me the courage for that one.) The last 'free' summer, followed by a wedding summer with honeymoon spent on Linda Mitchell Dombrowski's island in the St. Lawrence River, and the summer after that we had #1 son - #2 and #3 following. Since then it's been one big story of parenthood - as many of you know how your life is transformed. In between and among I've tutored and substituted; taught C.C.D.; organized a C.C.D. pre-school for 3 to 6 year olds and taken various courses to update my teachers certificate, the latest being Computer Programming - a journey into a new world. As for awards received, my husband says he is my award. He's right! Our children are James Perry L. ('L' for Lightfoot) - (Jimmy) age 7 years; John Michael Thomas ('Thomas' for my Dad) - (Mike) age 5 years; and Joel Ralph Star ('Star' for 'Jesus Christ Superstar') - we call him Joel and he's 3.

For the future we mainly hope to raise three kind and caring human beings, caring about God, themselves, each other and others; to take two more trips to Europe - one by ourselves on "$5 a day"; the other with the boys; to do more camping and to make all preparations smoother; to always have our home in Florida."

Joyce Tepley
3883 Turtle Creek
Dallas, Texas 75219 214-526-8520

After graduating from Barry Joyce went to the graduate school of social work and gained her MSW from Our Lady of the Lake College and Worden School of Social Service, San Antonio, Texas. She received the Outstanding Alumni Award of Texas from Worden School in 1970. Here are her thoughts and words: "I am still working at the same Community Mental Health Center in Dallas since I graduated with my M.S.W. seven years ago. Doesn't seem possible that it has been that long ago. In these past seven years I have grown from an altruistic, naive student social worker into an altruistic professional social worker interested in building caring communities of people. My professional duties at the clinic include individual, marital, and group therapy. Group therapy being my favorite. Also, I supervise B.A. level student social workers and M.A. level psychiatric nursing students in their field experience. Coordinating with other agencies such as child welfare, the school systems, hospitals, etc. for the better treatment of my clients can be harried and fun. Being an advocate for my clients as they move through various institutions - red tape, policies, getting 'put on hold' - has pushed me toward heavy thinking regarding alternatives. So I am getting a name for myself in the Dallas community as a teacher interested in prevention. I see therapy now as a nourishing process for one's emotional needs and I try to encourage people who feel alienated to come together and grow in strength drawing from each other - Sounds like my Catholic education is truly paying off in action for me now."

"Have also traveled to Spain, along the Mediterranean Coast and Tunisia, Africa. My favorite vacation spot is San Francisco. I spent overnight last summer at Tassajara - a Zen Buddhist Monastery with hot sulfur baths and fantastic vegetarian meals. The vibrations were healing. This is on the edge of Big Sur near Carmel. Sure wish there was a place like that near Dallas."

"Am looking forward to this reunion!"

Her husband, Bill, is a Field Engineer for Honeywell Computer Company. They met at a young adult dance in Detroit. She relates: "After graduation I lived with my parents in Holland, Michigan and worked at the city hospital waiting for acceptance of my application to work in Alaska. When my acceptance didn't come by December, I decided to get more experience in a bigger hospital and went to Detroit and worked in the intensive care unit at St. John's Hospital. I worked there until April of '66, then went out to California for my brother's wedding and some sightseeing. When I returned in May I started working for the Detroit Health Department as a public health nurse. I enjoyed public health work and had planned to get my masters in it, but marriage came first."

"Out of necessity we have taken up home remodeling as a hobby with Bill doing most of the work. Our first home in Niles, Michigan was completely remodeled before we sold it in the Fall of '73. We are not remodeling this home as extensively although there has been a big change in the home already. Before coming to Ft. Wayne we spent 4 months in Phoenix, Arizona while Bill was in training on additional machinery. It was an education for the 2 older children - seeing mountains and cacti and such. The future seems to hold another move for us. Things are not definite but it looks as though we are going to move back to Niles. Bill is being transferred back there. We may have to go down to Phoenix first for Bill's training."

"Bill and I are becoming involved in C.C.D. this year. Bill is teaching 7th grade and we are both taking the training courses which helped me realize how much I have retained from my learning at Barry - received one of the highest scores on the test. I hope to be able to teach C.C.D. to help me keep up with our Faith."

Much discussion centered around Papal announcements that parts of the Mass were to be said in the vernacular, come spring. The ANGELICUS editor gave Man-of-the-Year awards to Thomas Ogden, Fred Cook, Danny Obadiah, Frs. Burke, Jurasko 'to be sure,' and Monroe. The Student Council, headed by Joanne Rask, recommended that a juke box be obtained for the Thompson Hall canteen and that the cut system be revised. Oh, there'll never be a better class
Than that of '65!

We have courtesy and talent,
We have courage, we have pride,
In the College that we represent,
And faith in all we've tried...

Oh, here we are...
